* No significant difference has been shown between milk derived from rBST-treated and non-rBST-treated cows.

Important Nutrients

GOOD SOURCE OF CALCIUM & VITAMIN D IN EACH SERVING

- Kids don't always get enough calcium and vitamin D¹. Danimals yogurt cups provide a good source of both calcium and vitamin D to help support muscle and bone health²
- Calcium and vitamin D work together to help build and maintain strong bones^{3,4}

What Makes Danimals So Special?

LIVE & ACTIVE CULTURES

- Unlike some other yogurt brands, Danimals yogurts contain live and active cultures.
- Active cultures, *S. Thermophilus* and *L. Bulgaricus*, are what make yogurt what we know and love, like the delicious taste and texture.
- Unlike Danimals yogurts, some yogurts are heat-treated after fermentation, which kills the beneficial active cultures found in the yogurt.

This symbol helps you recognize that the yogurt contains live and active cultures. Our yogurts are tested for live and active cultures by an independent third-party laboratory.

MADE WITH MILK FROM FAMILY-OWNED FARMS*

98% of our farms are Dannon traced and controlled; 90% are Validus certified. Our products come from farms with strict animal-welfare and quality-control standards.

We work directly with farmers we know, such as McCarty Family Farms, the first dairy to successfully complete all four areas of third-party Validus certification.

DANIMALS IS PART OF DANONE NORTH AMERICA, A CERTIFIED B-CORP

Certified

Corporation

B Corp Certification is a mark of trust: a promise that a company is doing business in a way that meets rigorous standards of social and environmental performance, transparency and accountability. B Lab, a third-party non-profit certifies it.

OUR COMMITMENTS

Among other initiatives, Danone is working towards:

- 100% recyclable, reusable, or compostable packaging by 2025
- Reducing absolute methane emissions from its fresh milk supply chain by 30% by 2030
- Zero net carbon emissions by 2050
